For Immediate Release:

Baja Designs Soltek *Fuego* 4" Lights up the Night!

ATV and UTV owners can light the night on fire with Baja Designs revolutionary 4" Fuego light. Don't let the good looks fool you, the Fuego is all business! The Fuego incorporates all the durable features that have made the Soltek lights so popular with off-road racers, including Baja Designs exclusive three point vibration isolated mounting system with aluminum "Aim-n-Go" quick adjust knob. The "Aim-n-Go" feature allows the lights to be aimed up or down before you ride or on the trail without the use of tools. Fuego 4" lights use Multi-Surface Reflector (MSR) technology to provide the best quality light pattern possible and enables the 4" Fuego to approach the light output of an 8" light, yet it is small enough to be mounted almost anywhere!

Engineered by experienced off-road racers the Soltek beam patterns are large and smooth, eliminating distracting "hotspots" and "sharp cut-offs". Available in both HID or Halogen, and Driving, Wide Cornering, Spot and Wide Driving beam patterns, Fuego lights are ideal for all vehicles! Baja Designs HID versions use internally mounted Generation 5 ballasts and bulbs which makes mounting a breeze. The lightweight cast aluminum housing protects all components from harsh off-road conditions. If you want to make riding at night more enjoyable than you thought possible then check out Baja Designs Soltek Lighting Systems Today!

Baja Designs is a leading manufacturer and marketer of high-quality aftermarket lighting systems and adventure products for the off-road industry. Headquarters are located in San Marcos, California.
