For Immediate Release:

New Modular Light Bar by Baja Designs

The latest product in the Soltek Lighting line-up from Baja Designs is their Soltek Modular Light Bar which allows you to combine **both** Fuego 4" and LaPaz 8" lights! This innovative approach to light bar construction allows you to completely customize the design and width of your light bar without any fabrication!

What makes the Soltek Modular Light Bars so unique is the use of individual lightweight billet aluminum mounting "modules" consisting of rings, spacers and mounting brackets. These "modules" are purchased separately and quickly bolt together in any configuration or width and of course they retain Baja Designs patented "Aim-n-Go" tool-less adjustability. This freedom allows you to choose **any** combination of 4" Fuego and 8" LaPaz lights! Adding additional lights down the road has never been easier!

Baja Designs offers both bolt-on and weld-on mounting options for 1.5" and 1.75" tubing. The billet mounting "modules" allow the assembled light bar to be adjusted to nearly any angle. If height constrictions are one of your concerns you will be happy to hear that the popular clamp-on mounts allow the light bar to be quickly folded down providing that extra clearance that may be required for trailer transportation or storage. If you have been thinking about adding a light bar to your UTV, Truck, or Buggy then make sure to check out Baja Designs Modular Light Bar today!!

Baja Designs is a leading manufacturer and marketer of high-quality aftermarket lighting systems and adventure products for the off-road industry. Headquarters are located in San Marcos, California.
