For Immediate Release:

Soltek LEDgend LED UTV and ATV Kits Available NOW!

San Marcos, CA. - Baja Designs has always been your one stop shop for all your vehicle lighting needs. From race to recreation Baja Designs has a set-up that is right for every vehicle. Continuing to use the latest technologies available Baja Designs introduced the *NEW* LEDgend LED light which was tested during the 2007 Baja 1000. The LEDgend proved that it deserved to be a member of the Soltek Lighting Systems family and its performance is truly legendary.

“This new technology from Baja Designs has changed the way I look at night racing. It’s like having a secret weapon.” Kent Kroeker, SCORE Champion (Kore Racing)

Featuring 18 LEDs and a durable polycarbonate lens which incorporates race inspired optics and serves as a built-in rockguard, the LEDgend is truly in a class of its own. With a true pattern, instead of a large circle which wastes valuable light, the LEDgend puts light where you need it most and is offered in four patterns: Spot, Driving, Cornering, and Flood which can be interchanged in just minutes. Combine these benefits with Baja Designs patented Aim-N-Go adjustability, 3-point vibration isolated mounting system, and a 3 year warranty and you have a winning combination.

ATV and UTV owners deserve the latest in lighting technology and Baja Designs gives you just that. Making installation easy Baja Designs LEDgend LED kits install quickly and have you spending less time in the garage and more time on the trail. Complete with wiring harnesses, appropriate fuses, relays and switches Baja Designs takes the guess work out of installation. ATV and UTV specific kits are available NOW and prices range from \$484.95-\$939.95. Give Baja Designs a call today and remember, “If you’re scared of the dark....you haven’t seen the light”!

Baja Designs is a leading manufacturer and marketer of high-quality aftermarket lighting systems and adventure products for the off-road industry. Headquarters are located in San Marcos, California.
