For Immediate Release:

Baja Designs Inc. releases their Kwik Jak™

San Marcos, CA - Another innovative product from Baja Designs, Inc., your premier supplier of off-road adventure products since 1992. At only 4.5 lbs, the billet aluminum Kwik Jak™ is lightweight but performs like its heavy duty cousins. It is powered by standard 3/8-24 CO2 cartridges and can lift up to 2400 lbs. in just seconds. Its collapsed height adjusts from an easily stowable 12.5” up to 18.5” and it has a 6” stroke.

Multiple jack pad configurations allow the Kwik Jak™ to work on almost any vehicle. Another benefit of the jack is that it fits in a standard race car fire extinguisher mount for easy accessibility on tube frame vehicles. Kits are also available to adapt the jack to your on-board CO2 system or to use larger refillable CO2 canisters. Even better, the standard jack is only \$299.95 retail.

Alan Roach, head of R & D at Baja Designs said “I needed a jack for my race car and everything available was big and expensive. I knew we could do better so we set out to develop a jack that was small, lightweight, simple and inexpensive. I think our customers will be pleased with the results.”

Check out pictures and a video demonstration of the Kwik Jak™ at www.bajadesigns.com

Baja Designs is a leading manufacturer and marketer of high-quality aftermarket lighting systems and adventure products for the off-road industry. Headquarters are located in San Marcos, California.
