**For Immediate Release:**

## **PreRunner 6" Light**

Baja Designs new 6" Soltek PreRunner HID light is the perfect blend of size and performance that you need for race or play. The latest addition to the Soltek line offers you all the great features you have come to expect from Baja Designs. It is built to handle all the whoop pounding abuse you can dish out and backed by a Lifetime Warranty so you can keep the pedal on the floor and drive deep into the night for years to come!

According to Alan Roach, head of R & D at Baja Designs, Inc. "The pattern on the Soltek Pre-Runner 6" light is nothing short of amazing. We designed it to be a nice smooth wide pattern while still offering solid distance coverage. The result is superior to any other 6" driving light we have seen.

The 6" PreRunner incorporates Baja Designs exclusive three point vibration isolated mounting system with aluminum "Aim-n-Go" quick adjust knob. The "Aim-n-Go" feature allows the lights to be aimed up or down before you ride or on the trail without the use of tools. Engineered by experienced off-road racers the PreRunner beam pattern is large and smooth, eliminating distracting "hotspots" and "sharp cut-offs". The lightweight cast aluminum housing protects all components from harsh off-road conditions. If you want to make riding or racing at night more enjoyable than you thought possible then check out [www.BajaDesigns.com](http://www.BajaDesigns.com) today!

Baja Designs is a leading manufacturer and marketer of high-quality aftermarket lighting systems and adventure products for the off-road industry. Headquarters are located in San Marcos, California.
