Specifications:
Forward Projecting Lumens: 11,025 Utilizing 9 LEDs
Forward Projecting Wattage/Amps: 105W / 7.6A
IPT Lumens: 2,280 Utilizing 6 LEDs
IPT Wattage/Amps: 21W / 1.52A
Dimensions: 8" Diameter / 3.25" Depth
Weight: 6.5lbs
LED Life Expectancy: 49,930 Hours
Front Lens: Hardcoated Polycarbonate
Housing: Hard Anodized Machined Aluminum
Bezel: Billet Machined Aluminum
Hardware & Bracket Material: Stainless Steel
Exceeds MIL-STD810G (Mil-Spec Testing)
Built-In Overvoltage Protection
IP69K (Waterproof up to 9ft & Pressure Washable)
IK10 Compliant (Mechanical Impact Testing)

Description:
A design that was inspired by Baja Designs’ legendary 8” La Paz HID; The LP9 features modern styling and performance, with some of the most advanced LED technologies available today.

The LP9 utilizes 9 forward projecting LEDs to produce 11,025 Lumens at 105 watts, and 6 LEDs for Integrated Peripheral Technology (IPT) which produce 1,140 lumens at 10.5 watts per side. The IPT provides an incredible 200° spread of usable light.

The housing was designed to provide exceptional heat dispersion by using Direct Ducted Cooling, which allows air to travel from the front of the housing to the rear. With a day-time running light, low, and high power mode, the LP9 will fulfill all your lighting needs.

Available in a standard model that is perfect for a wide range of off-road use, as well as a Racer Edition configuration that is designed for the demands of high speed driving. The Racer Edition has similar power draw, but produces a much tighter pattern, providing higher visibility at greater distances. Both models feature uService technology, which allows customers to change the lens pattern and color depending on driving conditions, or simply when they want to refresh the lens.

Baja Designs Features:
- **Satisfaction Guaranteed** - 30 Day Money Back Guarantee
- **Limited Lifetime Warranty** - Complete Purchase Protection
- **uService®** - Replaceable Lenses And Optics
- **ClearView®** - All The Light, Right Where You Need It
- **MoistureBlock™** - Waterproof, Rain Proof, Submersible
- **CopperDrive®** - Only LED Driven At 100%
- **5000K Daylight** - Less Driver Fatigue, Natural Color

**LIMITED LIFETIME WARRANTY**

Baja Designs proudly offers a LIFETIME WARRANTY against manufacturer’s defect on all of the products that we manufacture. These are comprehensive warranties; other than the exclusions below – you’re covered. If your LED or HID bulb burns out, you’re covered. Additionally, cutting off our connector or changing your lenses does not automatically void your warranty.
Exclusions:
Installation errors, abuse, misuse or crash damage. You must be the original owner of the product and can supply proof of purchase.
Baja Designs manufactures its own products as well as resells products manufactured by others. Baja Designs makes no express or implied warranties on products not manufactured by Baja Designs including without limitation any warranties or merchantability and fitness for a particular purpose. We will however, pass on all warranties made by the manufacturer, who has sole responsibility for performing such warranties.
Baja Designs will pay the freight if your product is less than 90 days old, otherwise defective products must be returned to Baja Designs, Inc., freight prepaid. At our option, we will repair or replace items in question and return them at no charge. If the identical product is no longer available we will replace with a similar product of equal value. Baja Designs Inc. will not be responsible for any indirect or consequential damages in connection with defective merchandise.
Items purchased through a Baja Designs authorized dealer must be returned through the dealer. Only available on LED auxiliary lights and product must be in sellable condition at MSRP. Product that has been damaged in any way after the original purchase date will be excluded from this guarantee.

Indemnification:
Buyer hereby acknowledges off-roading, racing and driving at night are dangerous activities and that the products and/or supplies purchased from Baja Designs are used in an inherently dangerous activity that may endanger life and limb; and in no event shall the seller, or seller’s heirs and assigns, be held liable for consequential damages, nor shall seller’s liability on any claim for damages arising out of or connected with the sale, delivery, or use of purchased products and/or supplies exceed the purchase price of the products and/or supplies.

LP9 Mounting Instructions
1) Begin by removing the light and bracket from the box and orientate them as shown in the picture above.

2) Locate the ¼”-20 and 3/8” hardware in the provided hardware pack, and place center 3/8” bolt and two ¼”-20 bolts and associated washers through the bottom of the bracket. Use provided washers and nuts below the mounting surface tighten down after alignment.

3) Mount the bracket to the light using the remaining ¼-20 hardware (4 bolts and 4 washers).

Lens Swap Instructions (uService):

- When installing a different lens simply remove the 6 allen head bolts using a 4mm allen wrench on the back of the of the light.
- Carefully remove the front bezel and lens.
- Make sure that the o-ring is properly fitted in o-ring groove in the housing when installing the new lens and bezel. The o-ring is not directional but its shape was designed to match the groove in the housing.
- Reinstalling the bezel will give you a brand-new lens and pattern, depending on your preference.
- The bezel should be torqued to 7 ft./lb. in a “criss-cross” pattern.

1. **LP9 Wiring Instructions**

<table>

</table>

   - The LP9 is able to run at 12-36 Volts.
   - Low beam, high beam and Amber Backlight function off positive current.
   - **Do NOT power pins 1 and 4 at the same time.** This may cause damage to the circuit board!
   - If you are creating your own wiring harness the mating connector for the back of the light is a Deutsch Connector with part number DT06-4S. When you wire the light, you cannot supply power to the low beam (pin 1) & the high beam (pin 4) at the same time. **Use a three position toggle switch (on/off/on) that is single pole, double
throw. In one of the on position's it will supply power to the low beam. In the opposite on position it will supply power to the high beam. Custom wire harnesses must be made with 12 gauge wire for pins 1, 2, & 4. Pin three must use a minimum of 16 gauge wire. If the minimum size wire is not used, fire or damage to the light may occur.

We highly recommend use of our 64-0172, LP9 Pro Wire Harness to safely power up to two lights at a time. The 64-0172 includes switch, relay, connectors and ample lengths of wire for a full size truck.
